

We build security into networks

Mac Help OC offers and supports complete network security solutions that protect our clients from IT threats and allow them to manage all types of Internet risks.

Mac Help OC 's Consulting Services include security assessment, vulnerability assessment, and identification and resolution of access breaches and software security lapses. We offer a full range of security products including firewalls and VPN solutions, intrusion detection, content filtering, and anti-virus solutions.

We can help you protect your business from Internet threats with security appliances that provide real-time protection against all malicious Internet threats. Also combining integrated support for Anti-Spyware and Intrusion Prevention Service, Anti-spam Protection and Content Filtering Service.

We can help protect your business

Mac Help OC 's Network Security Consultants can help you select, deploy and manage Firewall and VPN appliances and provide training to help you manage these products and create a complete security strategy, including written policies, and design security into your business processes.
