

We install Apple TV

Apple TV gives you access to an easy-to-navigate world of entertainment. Rent HD movies. Buy HD TV shows. Listen to your iTunes music. Even show off your photos. Connect one HDMI cable and, just like that, Apple TV turns your TV into so much more.

Now appearing on HDTV: Your photos. YouTube videos.

And podcasts, too.

Your photos deserve a bigger stage. And Apple TV puts them on your widescreen TV, where everybody can see them in stunning high definition. Select My Photos to browse photos that are on your Mac or PC. You can also access your Flickr or MobileMe galleries. And you no longer have to gather around a computer screen to see YouTube videos and podcasts — Apple TV plays them big and bold on your TV's spectacular screen. [Read More about Apple TV](#)

Play your music through your home theater system.

With Apple TV, iTunes syncs wirelessly to your TV, so all the music you've collected can now be played on the best speakers in your house. The new Genius feature studies your iTunes library to automatically create a playlist of songs that go great together. You can also browse and buy music videos on the iTunes Store. And sync songs and videos purchased on Apple TV to your computer and iPod or iPhone.
